PROJECTS

Shop Management System (Laravel)

- Business management system built with Laravel, PHP, MySQL, Blade and JavaScript.
- Modules for sales, products, salesmen, expenses, vendor payments, finance and dashboard reporting.
- CRUD workflows, database relationships and validation, with automated expense entries for financial transactions.

Quiz System

- Quiz-system project built as web-development practice, focusing on application flow and data handling.
- Designed with a user-friendly interface.

REST API Backend

- Backend project practicing REST API concepts, including HTTP request/response handling and validation.
- Database-backed operations behind the API.

Shopify Store

- E-commerce storefront project built on Shopify.
- Practiced storefront layout and responsive presentation.

PERSONAL SKILLS

Problem-solving mindset • Willingness to learn • Team collaboration • Attention to detail • Practical project-based learning
